Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

Response to Arguments

1. Applicant's arguments, with respect to the rejection(s) of claim(s) 2-6,8-13 under Uto and Miyake have been fully considered and are persuasive. Therefore, the rejection has been withdrawn. However, upon further consideration, a new ground(s) of rejection is made (see ¶3).

The Examiner, however, notes the apparatus claims (2-6,8-12) recite a function without reciting a means for performing the function. The claims have been examined based upon the structural limitations.

Claim Rejections - 35 USC § 103

2. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

3. Claims 2-6,8-13 are rejected under 35 U.S.C. 103(a) as being unpatentable over Kawano USP 5,449,157 in view of Cook USP 6,491,492.

Kawano discloses an image forming apparatus (fig.1) comprising a sheet processing apparatus comprising a first roller pair (401), a second roller pair (421,422), a jogging tray (426), and open area (area between second roller pair and jogging tray), a discharging device (424), a bulging device (structural relationship that allows the

Art Unit: 3651

sheets to bulge from the second roller pair to the jogging tray), and a binding device (ST1), but does not expressly disclose the second roller pair driven to rotate at a circumferential speed that is slower than that of the first roller pair.

Cook teaches the second roller pair (18) driven to rotate at a circumferential speed that is slower than that of the first roller pair (C2/L21-26, 35-41) for the purpose of reducing bruising and buckling of the sheets (C1/L29-35).

At the time of invention it would have been obvious to one having ordinary skill in the art to drive the second roller pair at a circumferential speed that is slower than that of the first roller pair, as taught by Cook, in the device (or method) of Kawano, for the purpose of reducing bruising and buckling of the sheets.

Conclusion

10. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.

11. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Leslie A. Nicholson III whose telephone number is 571-272-5487. The examiner can normally be reached on M-F, 8:30 AM - 5 PM.
